

Activity 2: Styling Your HTML Page with CSS (with Media)

Objective

By the end of this activity, students will be able to:

- Apply CSS styles to improve the presentation of an HTML5 page.
- Use **selectors** (tag, class, id) to style different elements.
- Create a **flexbox navigation menu**.
- Apply background colors, fonts, spacing, and button styles.
- Style **media elements** (images and video) to fit the page design.
- Create a visually appealing and professional-looking page.

Instructions

1. Use the **HTML file from Activity 1** (your `practice1.html`).
2. Create a HTML file `practice2.html` with CSS instruction below.

Add a `<style>` block inside the `<head>` OR create an external file `style.css` and link it using:

```
<link rel="stylesheet" href="style.css">
```

- 3.
4. Apply the following requirements using CSS:
 - Give the page a **background color** and a **font-family**.
 - Style the `<header>` and `<nav>` to look like a **horizontal navigation bar** using **flexbox**.

Learning Activity: Practice 2

- Use **classes** (e.g., `.section-box`) to add padding, borders, or background colors to different sections.
 - Style the **table** to have borders, alternating row colors, and header styling.
 - Style the **form** so inputs, textarea, and buttons look neat and user-friendly.
 - Add hover effects for links and buttons.
 - Make the footer centered with smaller text.
-

More Instructions

1. Add **an image** (any picture of your choice) and **a video** (you can use a sample file or YouTube embed).
2. Use **CSS** to:
 - Style the **header and navigation bar** with Flexbox.
 - Add **background colors, fonts, and spacing**.
 - Style **media elements** (make the image responsive, center the video, etc.).
 - Use **classes** for reusable section styles.
 - Add hover effects for **links** and **buttons**.

Your output is something like this:

About HTML

HTML is the foundation of web development. It allows us to structure text, images, media, and forms.

Media Showcase

Above is a sample video embedded using the HTML5 <video> tag.

Sample Table

Name		Age	
Alice		20	
Bob		22
